

The Building Blocks of Chatty Child

At Chatty Child, we provide comprehensive therapy which helps to build the foundation for learning speech and language. In addition, our occupational therapists focus on maximizing your child's ability to function in his or her daily life. The therapists at Chatty Child achieve positive results that help your child to communicate and function effectively. Therapy sessions are tailored to each child's needs, interests, and strengths. We create treatment sessions that are personalized, innovative, and challenging.

We provide the important building blocks for learning that create a sound foundation for your child. At Chatty Child, this foundation will be based on fun, engaging, positive and successful learning experiences. These positive experiences will help to build your child's confidence and allow your child to become a successful communicator and learner for life.

What to Expect

- Child-centered care
- Dedicated therapists
- Professional atmosphere
- State-of-the-art learning facility

At Chatty Child, children learn through imaginative activities.

Chatty Child Speech & Occupational Therapy, PLLC was founded by speech language pathologist Heather Boerner, M.A., CCC-SLP, NYS licensed and ASHA certified. Chatty Child is a caring and supportive therapeutic center. We will welcome children with open arms, providing the stepping stones necessary for them to achieve their full potential in life.

Come experience Chatty Child and the exciting journey of learning to achieve and succeed through communication and play! Call **347.491.4451** today to schedule a consultation.

At Chatty Child, children are engaged in learning through a variety of sensory experiences.

The Guiding Principles of Chatty Child

- Growth should be facilitated in a positive and nurturing environment.
- Treatment sessions should be personalized to meet the needs of each child and family.
- An optimal learning environment is created by engaging the child in his or her interests.
- Children learn best through a multi-modality approach that encourages a variety of sensory experiences, creative play and critical thinking.
- Children are empowered to communicate effectively by drawing on their own unique strengths.
