InterAct: Theatre and Therapy Lab summer workshops combine fun theatre activities, and speech and language therapy into an engaging digital experience this summer. Classes run by Heather Boerner, MA, CCC/SLP, speech language pathologist and Gianna Cioffi, MS in Theatre Education.

Activities will include theatre games, story-telling and making, music and movement, arts and crafts, and imaginary play. These activities will focus on improving speech and language skills, social skills building, critical thinking skills, and improving cooperation and imaginary play and abstract thinking. Weekly virtual field trips will also be included. Choose Morning or Afternoon sessions, or sign up for both sessions. Each session will have different activities geared around the weekly theme.

These skills will be achieved through engaging, interactive and creative theatre games, literacy games, imaginary play, music, movement, and creative art projects.
